

## Employment Opportunity – CNC Milling Machine Operator

### Overview

A minimum of two years experience in CNC Milling Machine operation is essential. Applicants must have a good working knowledge and experience in the use of CAD systems, must be able to read and interpret complex engineering drawings and have a good understanding of geometrical dimensioning and tolerances. Applicants must also possess excellent analytical and interpersonal and communication skills.

### Duties and Responsibilities:

- The use and operation of CNC machines in the manufacture of press tools, press components, prototypes and welded assemblies
- Assisting the Production Manager in various other duties including maintenance of quality records, quality standards and production
- Working with the tool room team to complete jobs to specific schedules
- Maintaining accurate records and details of work in progress and completed work

### Skills Required

- Ability to work to high specifications and quality requirements in the production of machine tools
- Knowledge of and ability to operate machinery
- Ability to work to tight machining and manufacturing tolerances
- Ability to examine detailed drawings and/or specifications to assess job, material and equipment requirements
- Good knowledge of computers
- Ability to check accuracy and quality of finished parts and/or tools
- Accuracy with numbers- counting, measuring and arithmetic
- Ability to show accuracy and attention to detail in work
- Ability to work out sizes and allowances based on knowledge of metals
