
19th August 2021**Job Title:**

Industrial Electrician (Maintenance)

Job Overview:

Irish Pressings has an immediate vacancy for an experienced Maintenance Electrician to join the Irish Manufacturing Engineering Team of the Year at our plant in Gweedore, Co. Donegal.

The successful candidate will become an integral part of the Maintenance function at Irish Pressings – a globally-recognised high-quality supplier of press tools and metal stampings to the automotive industry.

Job Duties:

- Responsible for carrying out on-site electrical maintenance & minor installation works associated with various types of M&E equipment;
- Delivering of planned preventative maintenance (PPM) programmes;
- Investigations of reported Electrical faults, identify root cause and co-ordinate resolution of same;
- Tracing faults back to control panel, identifying faults within wiring circuits and resolving same;
- General maintenance requirements, testing motors, starters, etc;
- Supporting the Mechanical Maintenance fitters with installation of large industrial machinery and equipment on-site.
- Supporting the Mechanical Maintenance fitters with plant servicing requirements;
- Identifying parts required and successfully replacing same.
- Completion of all relevant daily checklists, reports and ensuring HSQE compliance.

Person Requirements:

- Fully-qualified (certified) electrician;
- Comfortable working in a large industrial engineering environment with heavy machinery;
- Experience in industrial electrical maintenance works strongly preferred;
- Familiarisation with mechanical and hydraulic maintenance would be considered an advantage;
- Excellent verbal and written communication skills;
- Ability to read and interpret electrical drawings essential;

Line Management:

- The Maintenance Department comes under the leadership of the Operations Manager

Working Details:

- Core working week of 39-hours (Mon-Fri)
- Shift pattern
- Salary commensurate on qualifications, demonstrable skills and experience
