

Conflict Minerals – Policy Statement

Doc ref	CMP-01	Revision	01
Issue date	30/09/2026	Next review	30/09/2027
Approved by	Declan Ward, Managing Director	Supersedes	Conflict Minerals Policy Statement dated 10/06/2023

Recognition

We recognise the significant adverse impacts which can be associated with extracting, trading, handling and exporting minerals from conflict-affected and high-risk areas. This includes tin, tantalum, tungsten and gold (3TG) and other minerals of concern such as cobalt and mica. As an end user of these products, we have a responsibility to protect human rights through our mineral and metal supply chain due diligence and not contribute to conflict.

Our Commitment

- Irish Pressings is committed to taking necessary steps to comply with all applicable legislation regarding conflict minerals, including the EU Conflict Minerals Regulation (EU) 2017/821 where it applies, and to follow the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas.
- We support industry-wide efforts to identify the source of these minerals and to source, through our supply chain, from smelters and refiners that conform to the Responsible Minerals Initiative (RMI) Responsible Minerals Assurance Process (RMAP) or an equivalent recognised programme.
- Each supplier to Irish Pressings that provides products that include these minerals is required to submit their sourcing information using the latest RMI Conflict Minerals Reporting Template (CMRT) for 3TG and the RMI Extended Minerals Reporting Template (EMRT) for cobalt and mica, or other similar globally-recognised template that traces the metals back through the supply chain.
- We will provide our customers with completed CMRT and EMRT declarations on request.
- If we become aware of a supplier whose supply chain includes metals from a conflict source, we expect to take the appropriate action to remedy this situation in a timely manner, including reassessment of supplier relationships.
- We expect our suppliers to take similar measures with their suppliers to ensure alignment throughout the supply chain.
- Concerns about the sourcing of minerals in our supply chain can be raised with Irish Pressings through the channels set out in our Protected Disclosures (Whistleblowing) procedure.
